

Mobile Pre-Check Has Arrived

Allowing us to spend more time on you not your paperwork

Dear Patients,

We have implemented a simple and easy way to streamline the check-in process for you. We have now introduced Mobile Pre-Check. This new mobile check-in works in conjunction with our kiosks and allows you to take care of a lot of the “paperwork” prior to arriving for your appointment simply by using your home computer, tablet or mobile device. It’s simple. Here’s how it works:

Schedule your appointment.

3 days prior to your appointment you will receive a reminder with a link to “CONFIRM” your appointment.

Once you confirm your appointment you can then begin the precheck-in process via your mobile device or computer.

When you arrive at the office on the day of your appointment, please sign in at the kiosk. (This check-in will be much shorter than usual because you have already completed the pre-check at home.) Checking-in at the kiosk will alert the staff that you have arrived.

You may then be seated. We will be with you shortly.
